02 Acknowledgement

OUR GRATITUDE

We express our sincere gratitude to our faculty, college, friends and family for their support and encouragement during the development of the RTO Management System.

GUIDANCE

Special thanks to Prof. Pradip Rajput for guidance, motivation and valuable suggestions.

Abstract

A web-based platform for easier RTO services

• Provides online access to RTO services such as Driving License, Renewal and Vehicle Registration.

• Users can upload documents, book appointments and check application status.

• Admin Panel manages users, applications, vehicles, appointments and payments.

• Reduces paperwork, waiting time and unnecessary physical visits to the RTO office.

• Developed using PHP, HTML, CSS, JavaScript and MySQL.

USER

Register • Apply • Upload • Track

ADMIN

Manage • Verify • Update • Monitor

DATABASE

Centralized MySQL records

04 Introduction & Project Description

WHY RTO MANAGEMENT?

RTO manages vehicles, vehicle owners, driving licences and traffic challans. Manual record handling becomes time-consuming as the number of users and vehicles increases.

OUR SOLUTION

The system brings registration, licence services, vehicle records, applications, appointments, challans and payments into one web-based platform.

Major Services

- User Registration & Login
- Vehicle Registration
- Driving License Services
- License Renewal
- Vehicle Details
- Challan Checking
- Appointment Booking
- Online Payment

05 Project Profile

Project Title	RTO Management System
Project Type	Web-Based Application
Domain	RTO / Transport Management
Frontend	PHP, HTML, CSS, JavaScript
Backend	PHP
Database	MySQL
Database Tool	phpMyAdmin
Development Tool	Visual Studio Code
Web Server	XAMPP
Main Users	User and Administrator

06 Environment & Technologies

HARDWARE REQUIREMENTS

Intel Core i3 or higher
RAM: 4 GB or higher
10 GB free hard disk space
Standard monitor, keyboard and mouse

SOFTWARE REQUIREMENTS

Windows 10/11
PHP, HTML, CSS, JavaScript
MySQL + phpMyAdmin
XAMPP + Visual Studio Code
Chrome / Edge

Technology Stack

HTML5 + CSS3
Structure & design

JavaScript
Validation & interaction

PHP
Server-side logic

MySQL
Relational data

Apache/XAMPP
Local server

phpMyAdmin
Database management

07 System Modules

USER

Registration, Login, Profile

VEHICLE

Vehicle registration & details

APPLICATION

RTO service applications

APPOINTMENT

Slot booking & confirmation

CHALLAN

View traffic challans

PAYMENT

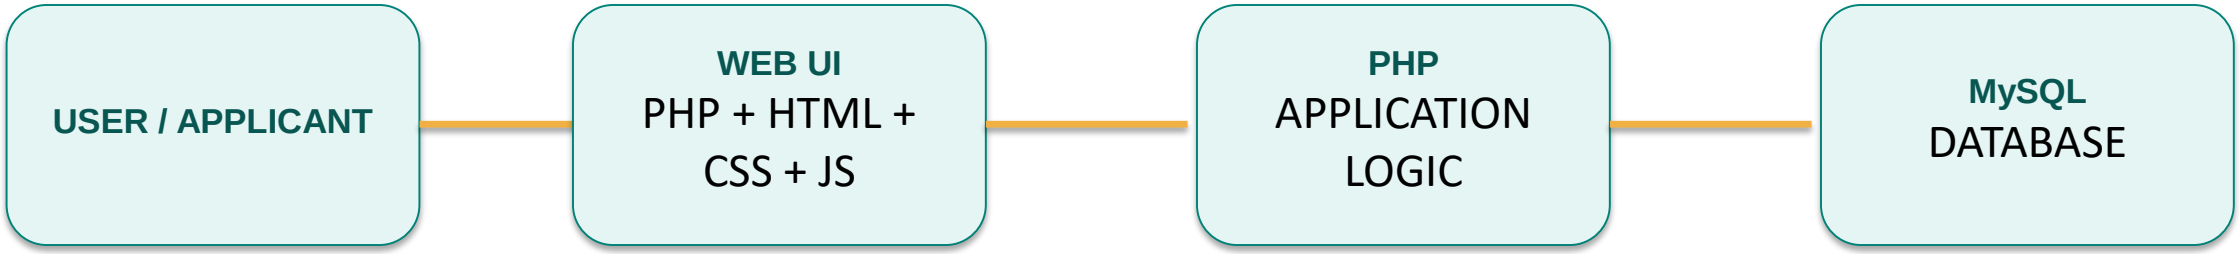

Online payment records

ADMIN

Central record management

08 System Architecture

User → Web Application → Database → Admin

Admin

Admin Dashboard • Users • Vehicles • Applications • Appointments • Challans • Payments

09 Database Design – Data Dictionary

Main Tables / Data Collections

Users	id, name, email, password, mobile, address, created_at
Vehicles	id, user_id, vehicle_no, owner_name, type, model, fuel, chassis, engine
Applications	id, user_id, application_type, reference_no, status, details
Appointments	id, user_id, service, applicant, mobile, date, time, office, status
Challans	id, challan_no, violation, amount, vehicle_no, status, date
Payments	id, user_id, application_id, amount, payment_for, transaction_no, status

Database: MySQL relational database • Tool: phpMyAdmin

Data Dictionary — Users & Vehicles

Field	Type	Size	Purpose
id	Integer	11	Unique user identifier
name	Varchar	100	User name
email	Varchar	100	Email address
password	Varchar	255	Authentication password
mobile	Varchar	15	Mobile number
address	Varchar	255	Residential address
created_at	Timestamp	-	Account creation time

Field	Type	Size	Purpose
id	Integer	11	Vehicle identifier
user_id	Integer	11	Owner user reference
vehicle_no	Varchar	30	Registration number
owner_name	Varchar	100	Vehicle owner
vehicle_type	Varchar	50	Vehicle category
vehicle_model	Varchar	100	Model name
fuel_type	Varchar	30	Fuel type
chassis_no	Varchar	80	Chassis number
engine_no	Varchar	80	Engine number
registration_date	Date	-	Registration date
status	Varchar	30	Current status

Data Dictionary — Applications, Appointments, Challans & Payments

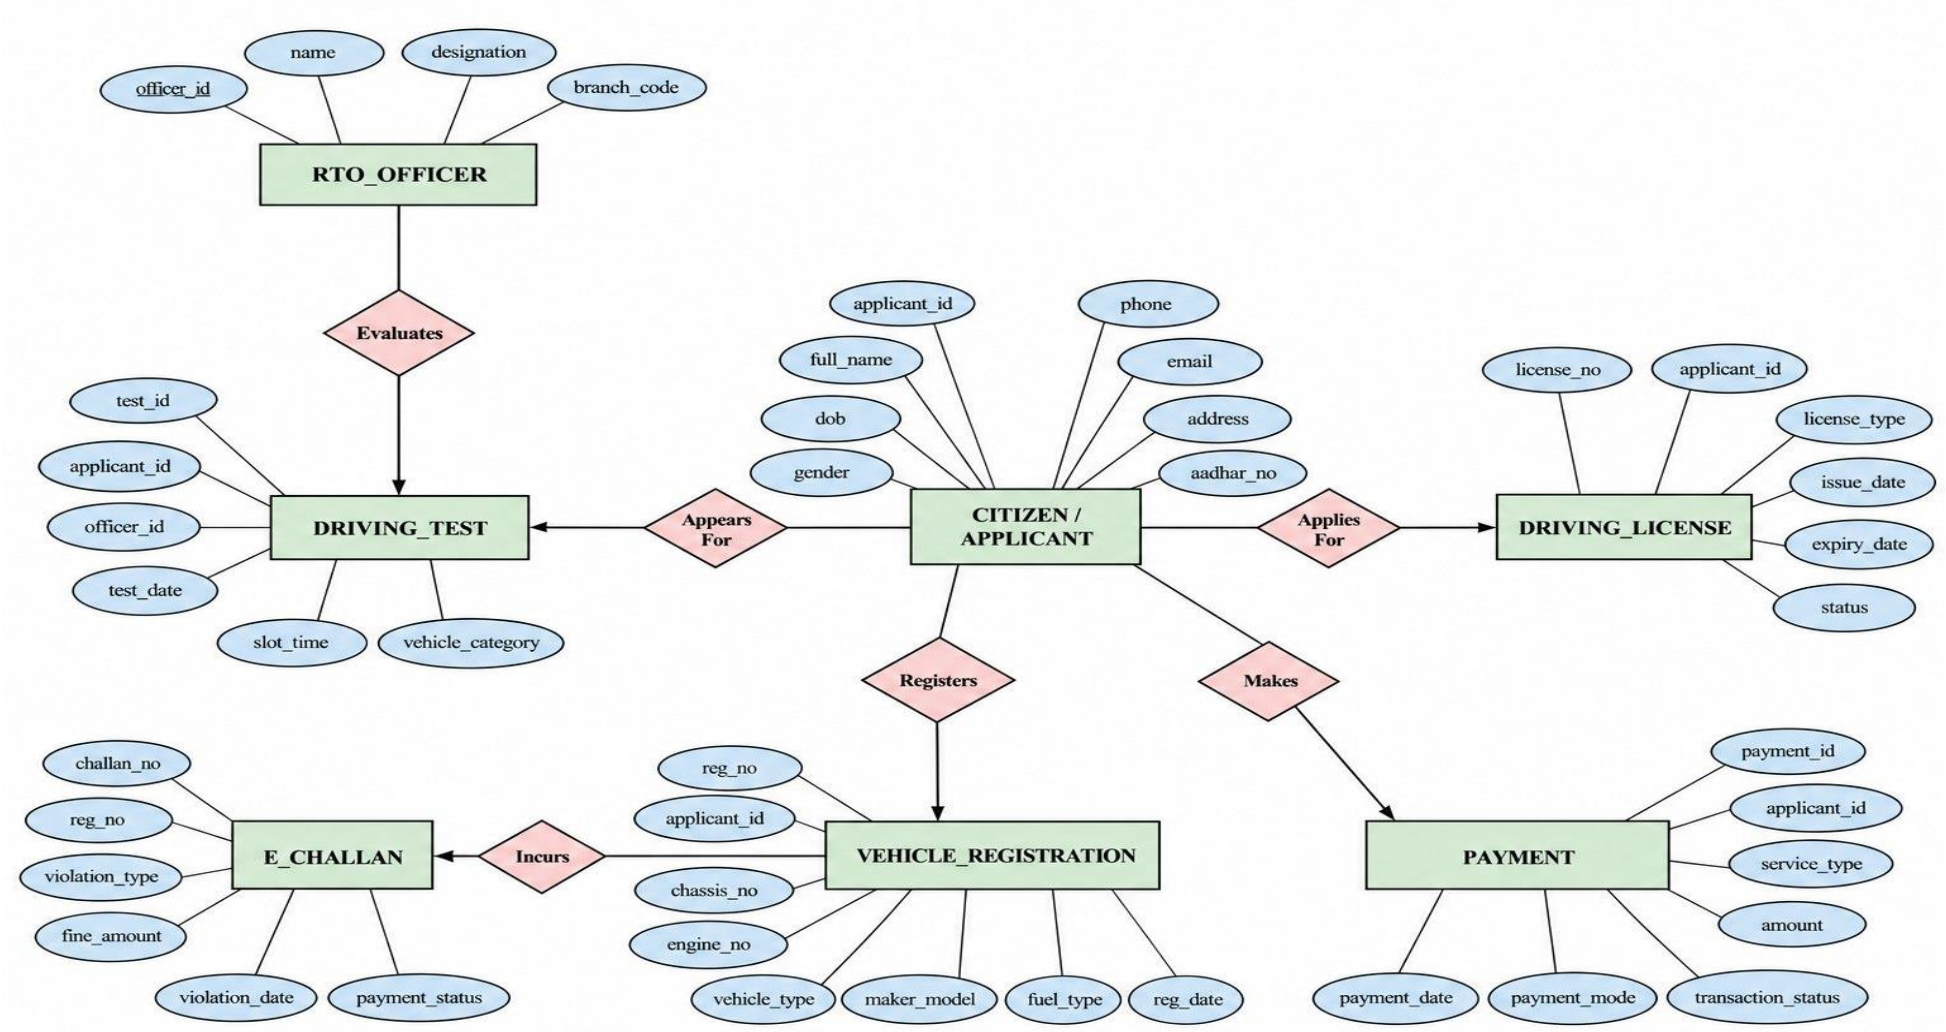

Table	Key fields
Applications	id, user_id, application_type, reference_no, status, details, created_at
Appointments	id, user_id, service, applicant_name, mobile, appointment_date, appointment_time, office, status, created_at
Challans	id, challan_no, violation, amount, vehicle_no, status, challan_date, created_at
Payments	id, user_id, application_id, amount, payment_for, transaction_no, status, paid_at

Entity-Relationship Diagram Features

- Consumer information management
- Bill and electricity usage records
- Payment transaction records
- Complaint and grievance records
- Consumer–Bill relationship
- Consumer–Payment relationship
- Consumer–Complaint relationship
- Bill–Payment relationship
- Unique IDs for each entity
- Organized and centralized database structure

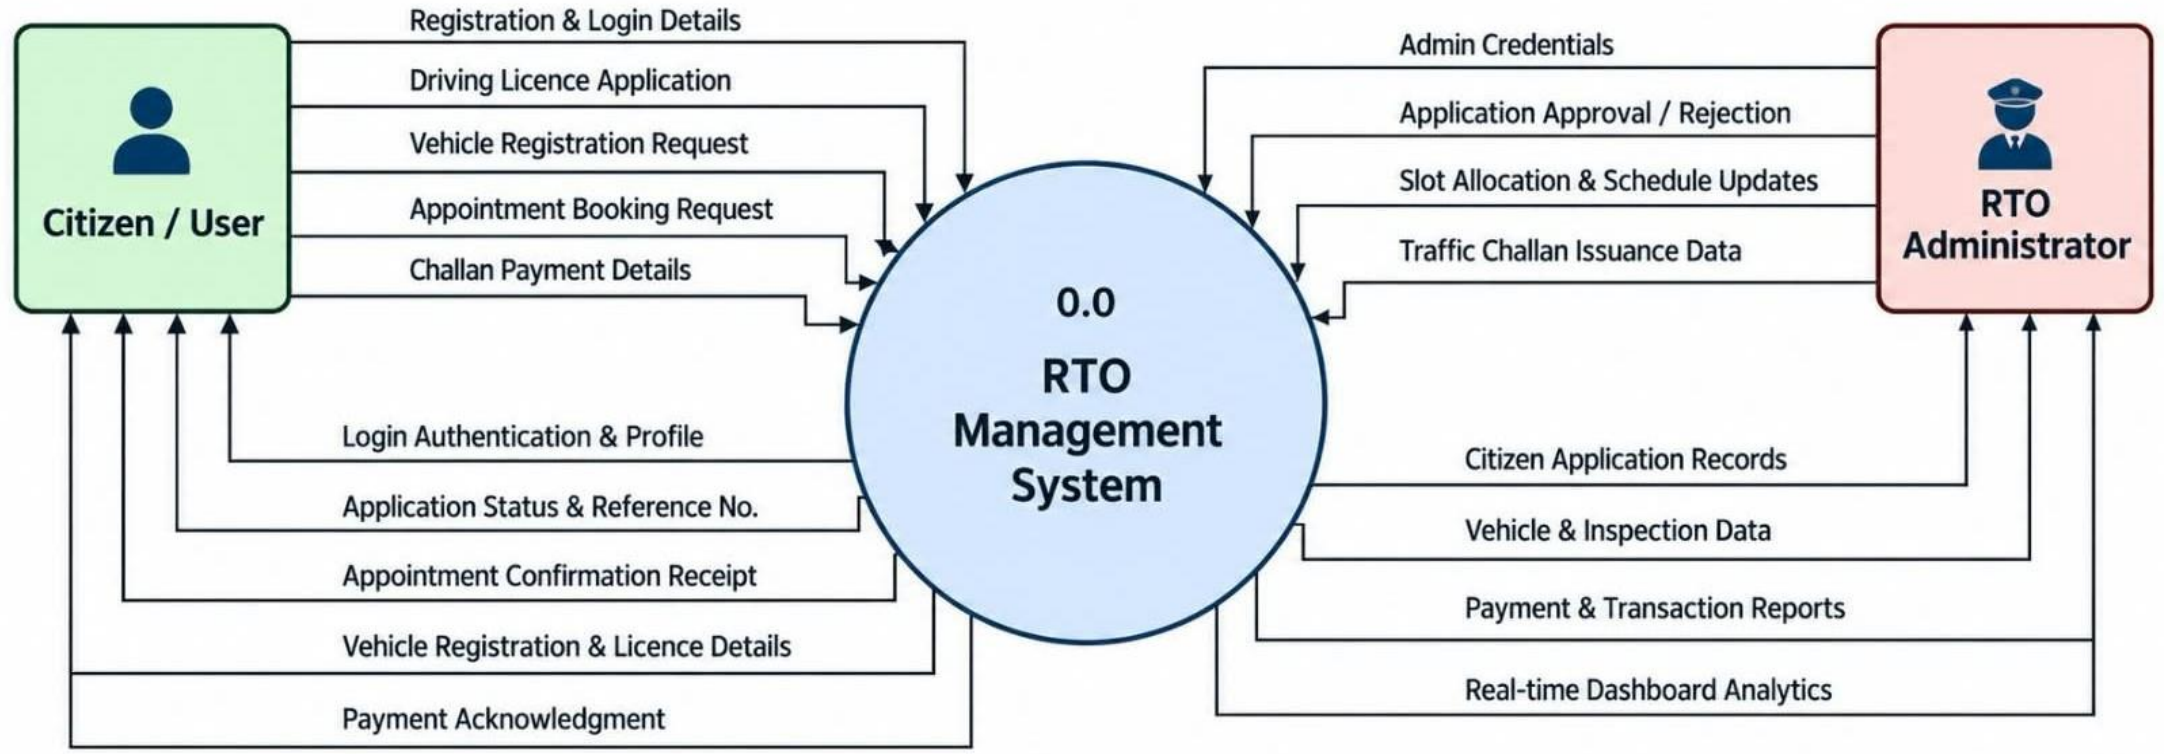

Users connect with Vehicles, Applications and Appointments; Applications connect with Payments; Vehicles connect with Challans.

Scope, Objectives & Benefits

SCOPE

Manage users

Vehicle records

RTO applications

Appointments

Traffic challans

Payments

Application status

Admin records

OBJECTIVES

Easy RTO services

Reduce paperwork

Save time

Central database

Easy search & update

Manage records

User-friendly system

Reduce office visits

BENEFITS

Saves time

Less paperwork

Quick search

Better organization

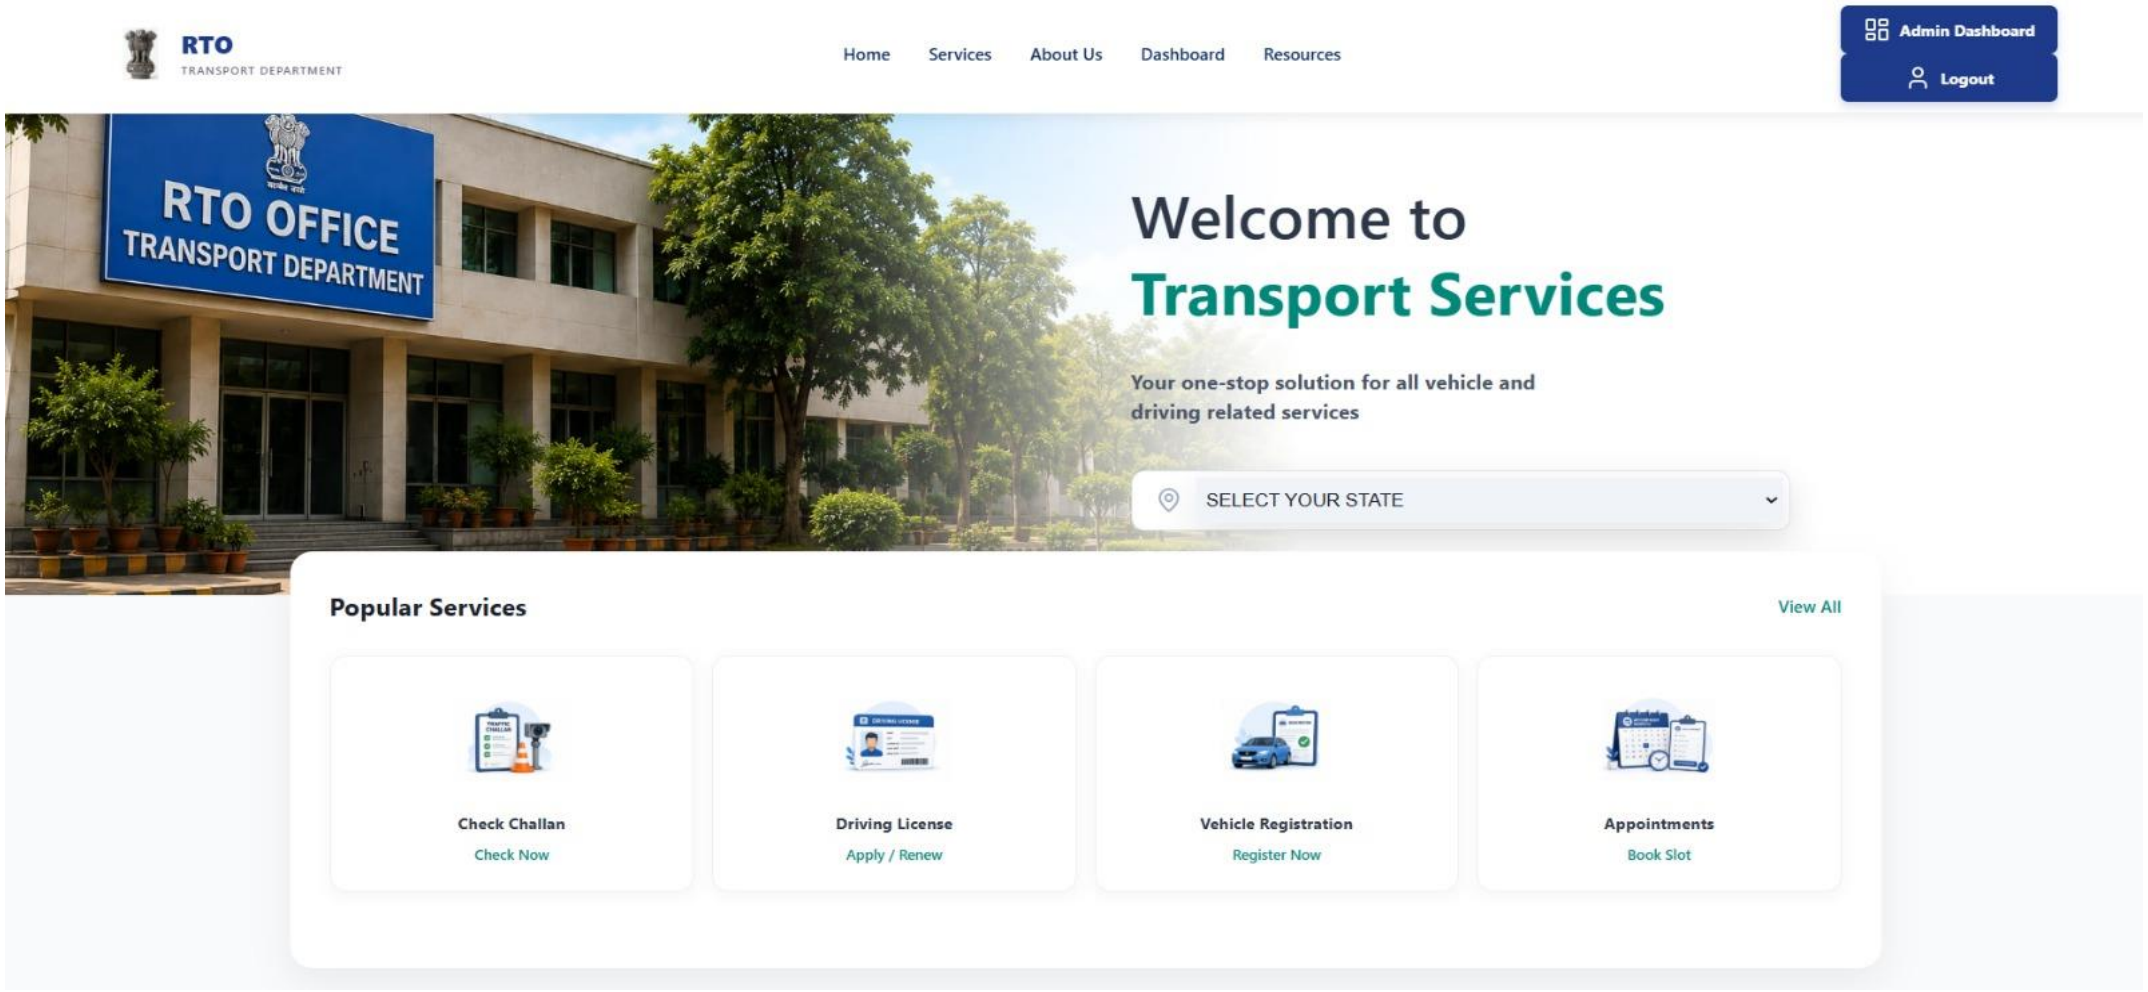

Easy to use

Admin control

Better service

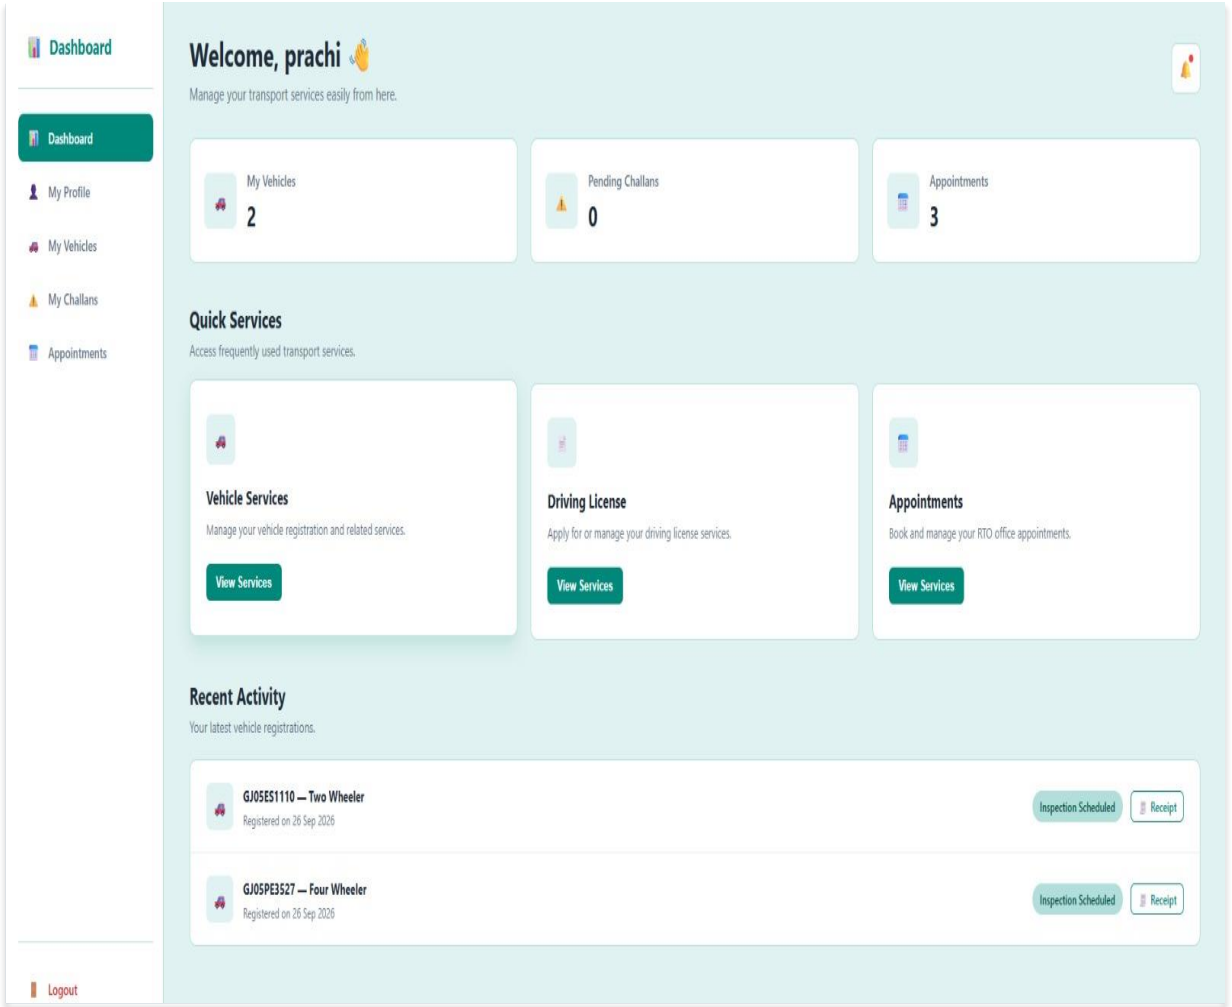

System Design – Input Screens

Home page

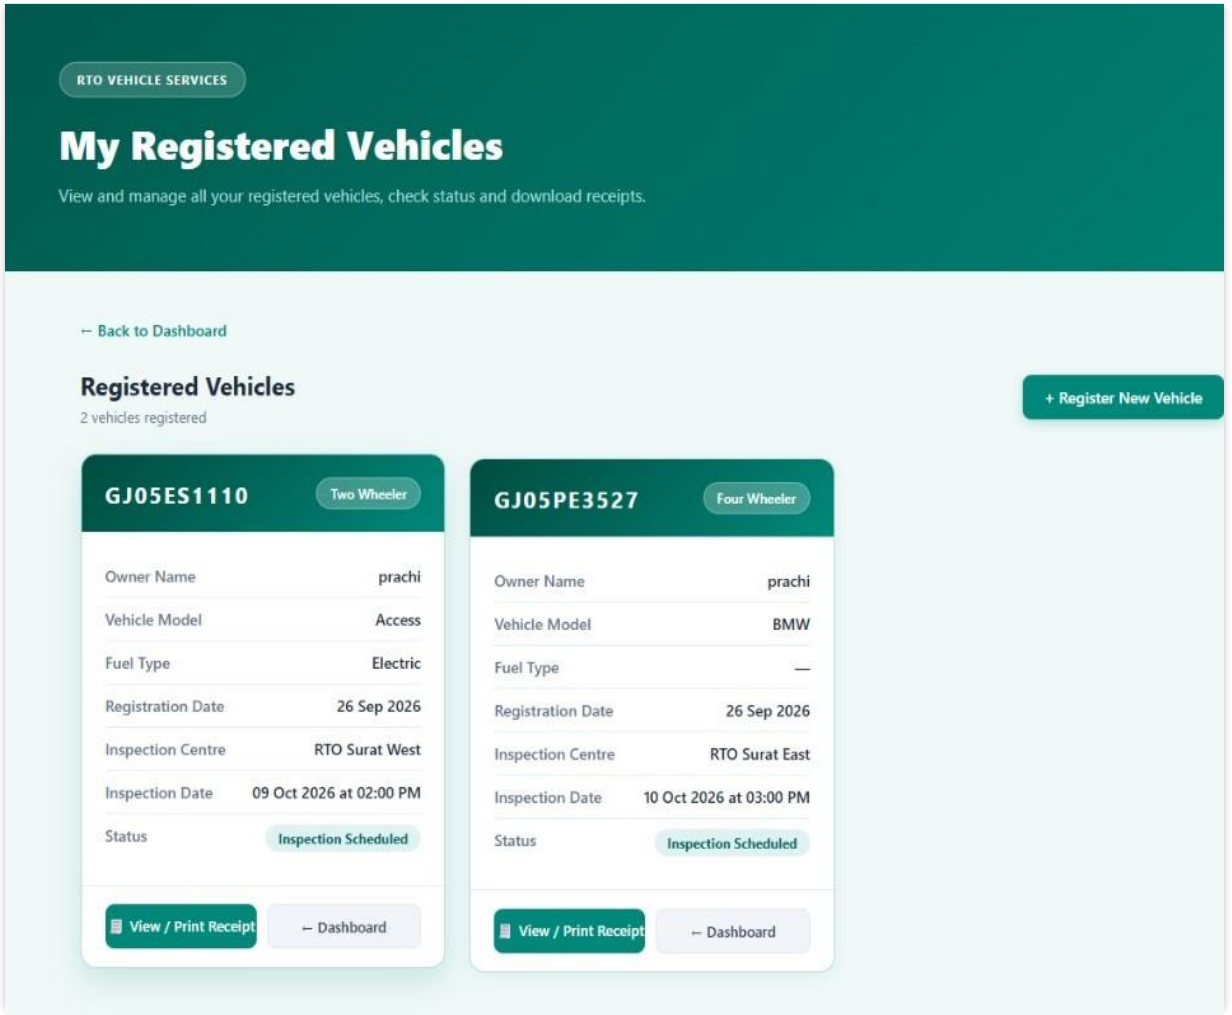

Consumer Interface

Consumer Dashboard & Profile

View Registered Vehicles

Admin, Testing & Future Enhancement

Admin Features

- Admin login & validation
- Consumer and bill records
- Bill generation
- Payment management
- Complaint management
- Revenue management

Testing

- Login & registration validation
- Vehicle and application records
- Appointment booking
- Challan checking
- Payment processing
- Admin update operations

Future Enhancements

- Online document verification
- SMS / Email notifications
- Mobile application
- Digital driving licence
- Vehicle tracking
- Advanced admin reports
- Multi-language support

Conclusion & Thank You

RTO Management System

A simple web-based solution to manage RTO services, records, applications, appointments, challans and payments.

DIGITAL

Online services

CENTRALIZED

MySQL records

EFFICIENT

Less manual work

USER-FRIENDLY

Easy access
